DEFRA (Ref: MO43) For Weather Forecast Planning Issued on Monday, 22 March 2021 at 02:12 local time

Air Quality Forecast for the UK

Issued by the Met Office

Today: Air pollution levels should be generally Low across the UK. Parts of southern Britain may see isolated Moderate levels however, more likely near larger urban centres as locally-emitted pollutants may prove slower to disperse in lighter winds.

Tomorrow: Developing breezy conditions should help mean that air pollution levels revert to Low across the UK.

Outlook: Increasingly breezy and unsettled weather arriving from the Atlantic should mean that air pollution levels stay Low throughout this three-day period.
